

Stop on Red: Save Lives, Improve Safety

Motorists who travel some of Fort Lauderdale's busiest intersections should be aware that cameras are being utilized as part of the City's effort to use technology to deter red light runners.

During a six-year period, between 2004 and 2009, traffic crashes occurring at signal controlled intersections in the City resulted in 26 fatalities. Red-light accidents often are among the worst because they generally involve vehicles crashing directly into the driver or passenger side of another vehicle at high speeds.

The State of Florida's "Mark Wandall Traffic Safety Act," effective July 1, 2010, established a fine of \$158 for each red-light running offense.

Photo enforcement cameras, operating 24-hours a day, will capture still images and video of red-light runners.

Signs reading, "Photo Enforced," will be installed to alert motorists to the red-light cameras.

Cameras are scheduled for the following locations:

- N. Federal Highway at N.E. 8th Street
- N.E. 15th Avenue at E. Sunrise Boulevard
- S.R. 84 at S.W. 9th Avenue
- W. Sunrise Boulevard at N.W. 15th Avenue
- W. Commercial Boulevard at N.W. 21st Avenue
- S. Federal Highway at S.R. 84
- N.W. 62nd Street at N.W. 9th Avenue
- W. Commercial Boulevard at N.W. 9th Avenue
- N.W. 62nd Street at N.W. 31st Avenue
